Q2 ✓
9. Include missing statements and display the list of elements in linkedlist
10 marks

Q3 ✓
1. Find the bugs, include the missing lines in the following snippet.
10 marks

3/3 answered

```
int data;
struct Node *next;
};

int main() {
    struct Node *newNode;
    newNode->data = 10;
    newNode->next = NULL;
    printf("%d", newNode->data);
    return 0;
}
```

Your Code

```
1 #include<stdio.h>
2 struct Node{
3     int data;
4     struct Node*next;
5 };
6 int main() {
7     struct Node*newNode;
8     newNode=malloc(sizeof(struct Node));
9     newNode->data=10;
10    newNode->next=NULL;
11    printf("%d",newNode->data);
12    return 0;
13 }
```

Submitted

Input

stdin input

Output

10

Q1 ✓
8. Buggy code in node creation
10 marks

Q2 ✓
9. Include missing statements and display the list of elements in linkedlist
10 marks

Q3 ✓
1. Find the bugs, include the missing lines in the following snippet.
10 marks

3/3 answered

Q2 9. Include missing statements and display the list of elements in linkedlist 10 marks

```
void display(struct Node *head)
{
    while(head != NULL);
    {
        printf("%d ", head->data);
        head = head->next;
    }
}
```

Your Code

```
1 #include<stdio.h>
2 struct Node{
3     int data;
4     struct Node*next;
5 };
6 void display(struct Node*head) {
7     while (head!=NULL){
8         printf("%d",head->data);
9         head=head->next;
10    }
11 }
12 int main() {
13     struct Node*head=malloc(sizeof(struct Node));
14     head->data=10;
15     head->next=NULL;
16     display(head);
17     return 0;
18 }
```

Input

stdin input

Output

10

Q2 ✓
9. Include missing statements and display the list of elements in linkedlist
10 marks

Q3 ✓
1. Find the bugs, include the missing lines in the following snippet.
10 marks

3/3 answered

```
return i;
}
return -1;
}
```

Your Code

```
1 #include<stdio.h>
2 int linearSearch(int arr[],int n,int key){
3     for(int i=0;i<n;i++){
4         if(arr[i]==key)
5             return i;
6     }
7     return -1;
8 }
9 int main() {
10     int arr[]={10,20,30,40,50};
11     int n=sizeof(arr)/sizeof(arr[0]);
12     int key=30;
13     int result=linearSearch(arr,n,key);
14     if(result!=-1){
15         printf("element found at index %d",result);
16     }
17     else{
18         printf("element not found");
19     }
20     return 0;
21 }
```

Input

stdin input

Output

element found at index 2
